

Petter Åstedt

Frontend web developer

ABOUT ME

Born and raised in Sweden, I'm Petter, a hungry web developer looking for new opportunities in the Berlin area. I have experience working with modern technologies such as **ES6, Node.js, Express, MongoDB and React**, as well as delivering pixel perfect components to clients using **HTML5, Javascript and SASS**. Excellent people skills due to my background in tourism and service, curious by nature, **highly motivated to learn and to develop myself professionally.**

WORK EXPERIENCE

Frontend web developer

2019

BLEECH.DE

Bleech is a web development agency in Berlin. At bleech I develop websites for different companies in co-operation with design agencies. We work in small teams developing components using HTML, Sass, JavaScript and PHP with wordpress as CMS.

Marketing project specialist

2015 - 2018

SNAPPCAR

SnappCar is a Dutch tech startup specialized in peer-to-peer carsharing. My journey at SnappCar started at the HQ in Utrecht as head of community support for the Swedish market. A role that later transitioned into a marketing oriented position at the Stockholm office. I believe that I made an lasting impact in the company due to my involvement in:

Single handedly setting up community support operations for the Swedish market.

A/B testing and redesigning of the Swedish website.

Setting up various marketing projects including email newsletters, seasonal campaigns and collaborations with partner companies.

TECH SKILLS

Markup & styling
